

アルミニウム硬質陽極酸化用添加剤

Additive for Hard Anodized Aluminum

トップハードナーAL TOP HARDENER AL

- 20°Cの処理で大幅なエネルギー削減

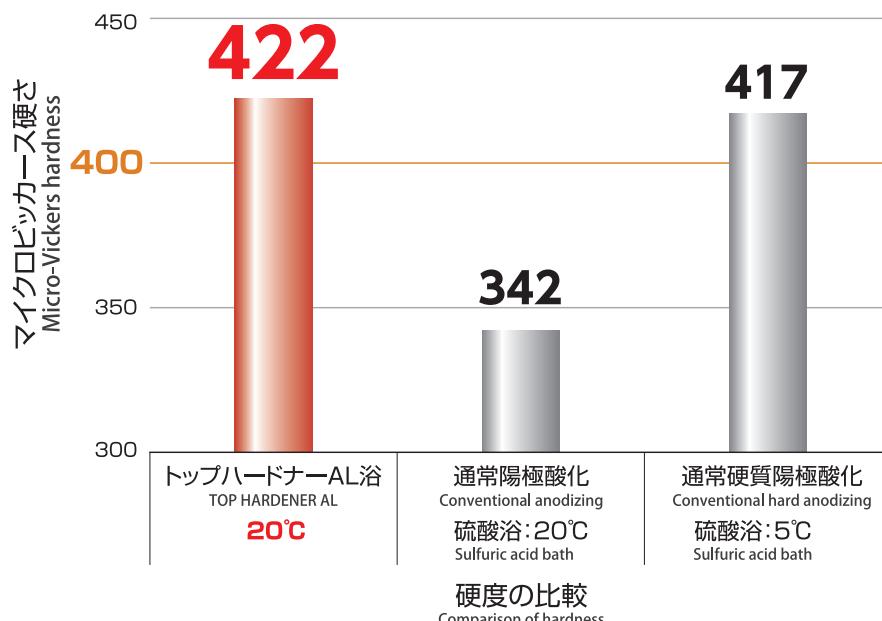

Low-temperature treatment is unnecessary

- Hv400以上の硬質陽極酸化皮膜が得られる

Hard anodized films over Hv400 can be formed easily

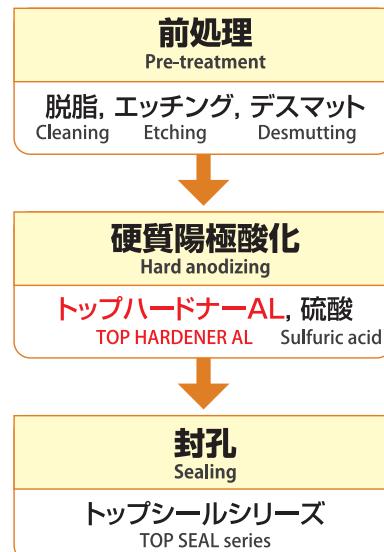

低温処理不要! Hv400以上!

Low-temperature treatment is unnecessary! Over Hv400!

処理工程

Process

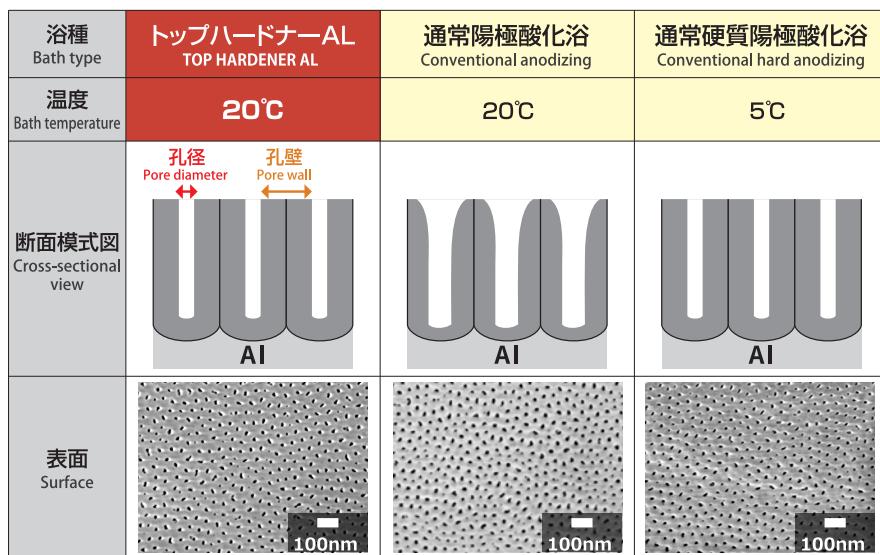

孔壁の溶解を抑制

Prevent pore wall dissolution

孔径が小さく高い皮膜硬度が得られる

Can make micro-pores, can realize great hardness

標準建浴/処理条件

Bath composition and working condition

トップハードナーAL TOP HARDENER AL	200ml/L
遊離硫酸 Free sulfuric acid	85g/L
溶存アルミ Dissolved aluminum	1g/L
浴温 Bath temperature	20°C
陽極電流密度 Anode current density	2A/dm ²
